AlohaKona 5.0 out of 5 stars One more thing, this is a 2.0 Modem and has an average Mbps transfer rate for streaming. Also, when I received the Modem, it looked brand new!I waited 1 hour like it said it could take and nothing.I had concerns since their service area seems to have some differences such as they still have basic cable and my area is all digital, and the modem I use in my area is not listed for that area. This model was listed for both areas and had the full in field testing rating. In both areas all we had to do was plug it in and wait a few minutes. No calls to the cable company, no hassles. Worked great when both connected to a router or directly to the computer. It was smooth sailing. It does take a little longer to cycle when first powered up than some modems Ive used, but not as long as others. So all in all I am quite pleased with this one.After I received it, I called BH tech support and we configured this modem in less than 10 minutes. Speedtest shows constant and high speeds. All in all, a good purchase.So far, so good same blazing speed, plugandplay setup, and seamless integration with Comcast internet service. Im sure this also works with other ISPs, as well.

I just had to connect it and provide the MAC address. After that, I rebooted my PC and router and, when they came back up, the modem was working just as well as my old one. Please note that I have turbo internet service, not one of the higher grades; this modem will not work with any TWC higher grade than turbo.Price paid will be recovered for the rental cost I would have paid to Comcast in just 2 months. Have been using for a month, no issues so far. This looks like a Comcast discontinued model as DOCSIS 3 technology is getting popular in the market. I get anywhere between 13 to 25 GB download speed, and upto 5 GB upload spped with this DOCSIS 2 model, cant ask more for the price paid. This is not for you, if you like cuttingedge technology, you will need to pay the premium price. We are making sure you reach your intended destination.Thank you for your patience during the merger process.Id like to search by my new address. Try Customer Service Please try again.

But if you do not have the manual for your router or you do not want to read the whole manual to find the default login information then you can use the quick guide below. To get to the router login page it's necessary that you are connected to the router. The default password is blank. Sometimes the username and password doesn't work that we mentioned in the top of this guide.

Did you try the following IPs? In the list below we listed all known router IPs for the manufacturer Cisco. Maybe this will work for you. This can be done easily by clicking on the reset button at the back or at the bottom of your router. If you hold down this small button for approximately 20 seconds, you may have to use a toothpick, then your modem will get restored to the factory settings. What you need to keep in mind is that when you reset your modem, you will lose your connection online. It is therefore better to take an expert's assistance in this regard.
