Auto half load

The washing machine is fitted with a self adjusting water level system. This system enables the machine to use the amount of water needed to wash and rinse the laundry in relation to the particular load.

This results in a reduction of the water and electricity used, without in any way compromising the washing and rinsing performance.

In fact the amount of water and electricity used will always be appropriate for the clothes load.

The washing machine automatically ensures excellent washing results at minimum cost whilst respecting the environment.

Detergent drawer

The detergent drawer is split into 2 compartments:

- the compartment labelled "I" is for main wash detergent.
- the compartment labelled "II" is for special additives, fabric softeners, fragrances, starch, brighteners etc.

NOTE:

Some Detergents are Difficult to utilise. Ensure to use an in drum dispenser if recommended by the detergent Manufacturer.

Note: only put liquid products in the compartment labelled "II".
